

VR's Environmental Policy

VR's policy is to be in the forefront in the protection of the environment and consciously aim for a more sustainable future and systematically utilise the benefits of being the the largest union in Iceland.

VR's operations shall always emphasise sustainable use and the reduction of greenhouse gas emissions with focus on environmentally friendly transport, carbon-offsetting, and responsible procurement. Focus shall be put on reducing the formation of waste, emphasising reuse, responsible waste disposal, and recycling in all of the union's operations.

Environmental matters shall always be considered in decision making regarding policy formulation and investment. Education and presentation of VR's environmental actions shall be a part of the union's environmental policy. The operations of the union should encourage members to adopt and promote environmentally-friendly lifestyle both at home and in the workplace.
